OBJECTIVE

Software Quality Analyst / QA

SUMMARY

QA professional with experience in manual and automated testing, working on products such as CRM, ERP, CMS and web portals. At Jetimob, I progressed from Testing/QA Intern to QA Analyst, working with functional and exploratory testing, automation with Playwright and TypeScript, BDD, Cucumber, Page Object Model, API testing, SQL/PostgreSQL and CI/CD integration.

My background combines experience in Software Quality with a previous foundation in business consulting, project management and pre-sales. This experience supports an approach oriented toward understanding processes, requirements and different business contexts, in addition to identifying and investigating defects, documenting evidence and following up on fixes.

I aim to continue my career in Software Quality, deepening my work in manual testing and automation.

EDUCATION

Bachelor's Degree in Social Communication, major in Public Relations — Federal University of Santa Maria, 2026.

PROFESSIONAL EXPERIENCE

Jetimob *October 2023 to August 2026*

QA Analyst *November 2025 to August 2026*

- Execution of manual functional, exploratory, smoke and regression tests across multiple systems (CRM, ERP, CMS, Website and Real Estate Portal).
- Building and maintaining dozens of automated test scenarios using Playwright and TypeScript.
- Implementation of API tests via Postman and SQL queries in PostgreSQL, with integration of the test suites into CI/CD pipelines.
- Work on a Shift-Left strategy, developing a test suite in parallel with the evolution of the ERP system.
- Contribution to a bug detection rate above 90% before production, with weekly tracking of indicators.
- Identification and documentation of 28 pages of bug evidence in the ERP before launch, delivering the project with a zero bug backlog and no bug reports from clients for more than one sprint.

Testing/QA Internship *May 2025 to November 2025*

- Daily execution of exploratory manual tests, Black Box, White Box and Smoke Tests.
- Weekly regression testing before product deployments.
- Validation of features in Website, CRM, ERP (Financial Management and Rental Management) and Real Estate Portal.
- Documentation of test cases and logging of bugs and defects in Jira.
- Identification of critical API bugs and logic flaws in CRM opportunities and leads.
- Detection of logic errors in the ERP, preventing failures in production.

Pre-Sales/SDR Internship *October 2023 to April 2025*

- Lead qualification and identification of business opportunities for the Closers team.
- Conducting discovery conversations and understanding the needs of potential clients.
- Scheduling meetings and tracking opportunities in the sales process.
- Qualification of the company's largest client, with record monthly MRR and record meetings scheduled.

Objetiva Jr. — Business Consulting *June 2021 to December 2023*

Executive President *January 2023 to December 2023*

- Prospecting and management of 22 strategic partners.
- Development of strategic planning guided by OKRs and KPIs.
- Management and reactivation of an institutional event focused on diversity.

Commercial Director *April 2023 to December 2023*

- Individual record of prospecting via cold calls.
- Contribution to reaching the annual internal sales target.
- Delivery of 15 sales training sessions to the sales team throughout the year.

Projects Director *January 2022 to February 2023*

- Simultaneous management of 14 consulting teams, with 100% of deliveries rated NPS promoter (average 100).
- Conducting 4 project audits, with NPS collected on every delivery.
- Enabling 5 project resales with the consulting teams.
- Delivery of more than 20 training sessions for the consultant teams.

Business Consultant *June 2021 to December 2023*

- Career path that began as a Trainee, with promotion to Consultant, progression to Project Manager and work as Innovation Advisor within the projects area, a role I would fully take on as Projects Director the following year.
- Execution of 10 consulting projects as lead consultant, 9 rated NPS 10 and 1 rated NPS 9, in areas such as finance, strategy and, mainly, processes.
- Coordination of consultant teams and management of business consulting projects as Project Manager.
- Implementation of Customer Success processes.
